

BREW EXPRESS®

THE BUILT-IN-THE-WALL SELF-FILLING COFFEE SYSTEM

THE FIRST TRULY BUILT-IN-THE-WALL SELF FILLING COFFEE SYSTEM

FEATURES

1 SELF FILLING, JUST ADD COFFEE

The Brew Express self-fills on command and lays down an even spread of hot water over the ground coffee beans at the perfect temperature.

2 QUALITY COFFEE EVERY TIME

Designed to meet the Specialty Coffee Association of America standards for brewing the highest quality coffee. Our Brew Trak™ system ensures consistent brewing temperature regardless of incoming water temperature or voltage variation.

3 MORE COUNTER SPACE

The Brew Express is built-in-the-wall, leaving more room on countertops.

4 ADJUSTABLE CUP SELECTOR

You decide how much or how little coffee you want to brew. Select from a single mug or a full carafe.

5 ACCENT LIGHTING

Soft-blue nightlight can be controlled by an on/off switch.

6 SAFE AND RELIABLE

Because it's built-in-the-wall we designed it to last for years of use.

7 PAUSE-N-BREW SENSOR

The infrared sensor makes the carafe safe to remove while brewing and will never over fill the brew basket.

8 SAVE TIME

The Brew Express brews in 1/2 the time of conventional brewers.

9 PROGRAMMABLE TIMER/CLOCK

Program your Brew Express to wake you up or brew coffee any time of day.

ACCESSORIES FOR BE 104 & BE 110

OPTIONAL CARAFE LOCK

The optional carafe lock is great for using in your RV, Yacht, or just to make the Brew Express child safe.

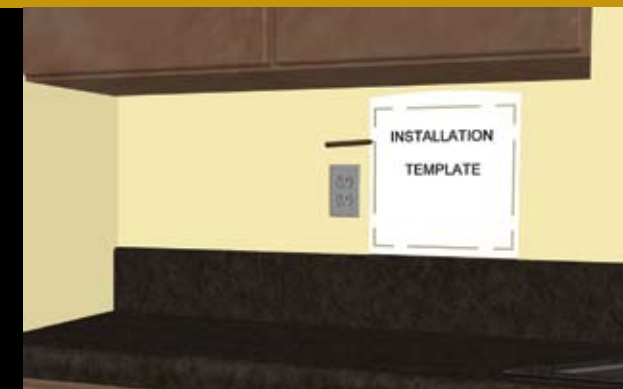

ADAPTOR PLATE

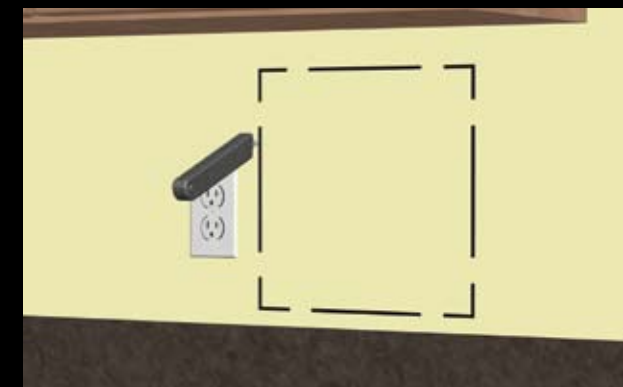

The adaptor plate allows you to quickly update your 12 cup Brew Express to the new 10 cup model.

INSTALLS IN EXISTING HOMES OR NEW CONSTRUCTION IN 5 EASY STEPS

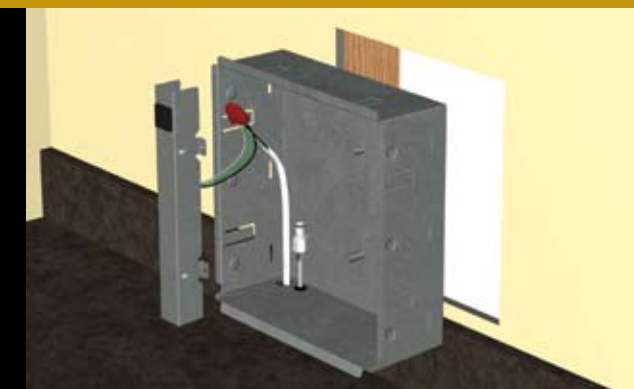

1 Place template to locate your Brew Express and mark pattern on the wall.

2 With utility knife cut opening in wall.

3 Route water line through cabinets from water source (sink or ice maker line), connect power to nearby outlet.

4 Connect wires and install water connector. Slide mounting box into wall and secure to stud.

5 Snap together water connectors together and slide Brew Express into mounting box.

UPDATE OR REPLACEMENT

To update to a newer model remove your old Brew Express and install the new mounting plate adaptor. Then, reconnect the quick connector to waterline and slide your new unit in place.

POWER AND WATER REQUIREMENTS

POWER 120VAC, 60Hz unit requires 12.9 amps for 1400W

WATER 1/4" water supply line (copper or poly) 30 psi to 90 psi. Potable cold water is required.
